

Spread the word about your internationalisation measures - We are happy to support you!

The HMIS2030 online platform

- **ensures visibility:** it is a collection of good examples around internationalisation and mobility promotion at higher education institutions in Austria. The OeAD promotes the platform nationally and internationally online, at education fairs and events.
- **is a space of inspiration:** you can take a look at examples from higher education institutions and at the same time submit your own initiatives.
- **is designed bilingually:** you can enter your examples in German and/or English.
- **saves time:** it is intuitive to understand and use through filters, keywords and its design.
- **is inclusive:** internationalisation is a cross-cutting issue. All employees of Austrian higher education institutions can upload examples of good practice.
- **is constantly growing:** you can make your initiative visible at any time via the registration button.
- **offers food for thought:** under the heading „Media“ you will find further literature, studies and position papers.

- **is strategically anchored:** it is the official digital support tool of the National Higher Education Mobility and Internationalisation Strategy 2030 (HMIS2030) .

Your higher education institution thus positions itself as...

- an attractive international partner for cooperation and networking
- an innovative educational institution
- a source of inspiration for strategic internationalisation steps
- a multiplier of holistically and/or inclusive internationalisation

The National Higher Education Mobility and Internationalisation Strategy 2020–2030 (HMIS2030) aims to promote the internationalisation of higher education institutions. The strategy, which was developed in a participatory process strategy, comprises five goals:

- Promoting a comprehensive culture of internationalisation at higher education institutions
- Promoting mobility for all higher education institution staff
- Development and realisation of innovative digital mobility formats
- Effective competence development and institutional learning
- Global Mindset - Austria's higher education institutions in the world

All goals are subdivided into implementation goals - the online portal offers the Austrian higher education institutions the possibility to manifest the lived practice around the HMIS2030.

Current examples on the platform:

+ Johannes Kepler University of Linz: Welcome Café for International Employees

+ St. Pölten University of Applied Sciences: E³UDRES² (Engaged and Entrepreneurial European University as Driver for European Smart and Sustainable Regions)
